FluxA

Empowering AI Agents to Discover, Pay for, and Invoke Services Autonomously

Current Problem

Agentic AI relies on humans to select and pay for resources before it can use them

Limitations of Existing Solutions

- Smithery: Only lists MCP tools. Requires manual selection and setup
- OpenTools: Limited services, pay-per-call model for agents
- Payman: Agent wallet, but no integration with the full agentic ecosystem
- Skyfire: Handles agent identity and payments, but lacks tool/service support
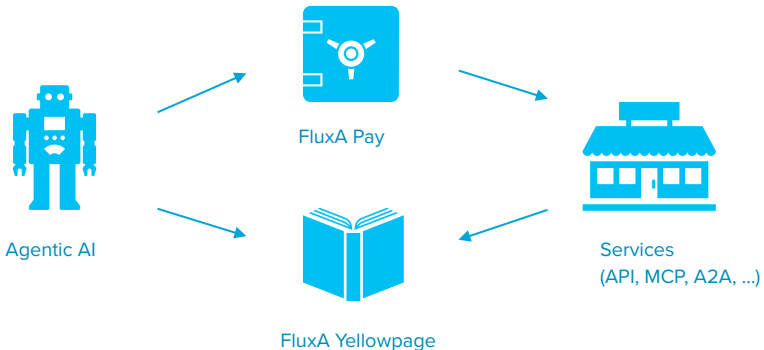

What Does FluxA Offer

FluxA Yellowpage

A resource listing, discovery, and transaction platform designed for Agentic AI

FluxA Pay

An aggregated wallet system that Agentic AI can use — enabling merchants to easily receive payments from Agentic AI.

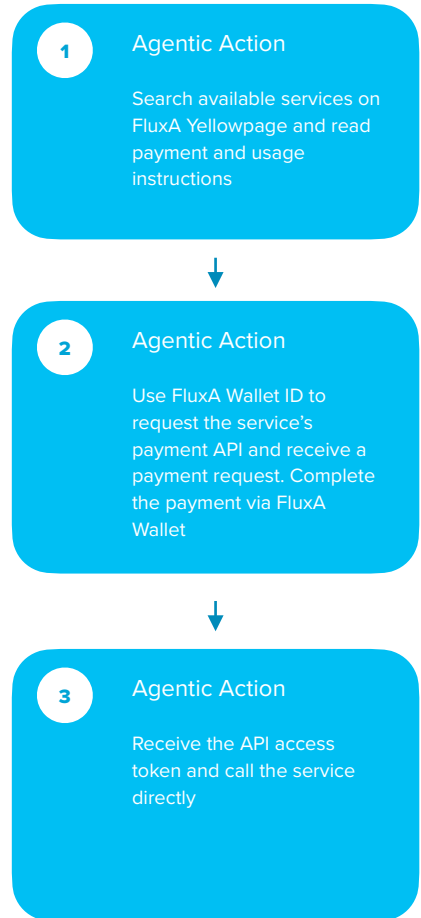

Agentic AI

FluxA Pay

FluxA Yellowpage

Services
(API, MCP, A2A, ...)

How Does Agentic AI Work via FLUXA

Existing Process

1 Agentic Action

Tell the user what tools are needed

2 User Action

Go to the tool's website and sign up

3 User Action

Bind a credit card and complete the subscription

4 User Action

Give the API key to the Agentic AI

5 Agentic Action

Call the service through the API key

Process with FluxA

1 Agentic Action

Search available services on FluxA Yellowpage and read payment and usage instructions

2 Agentic Action

Use FluxA Wallet ID to request the service's payment API and receive a payment request. Complete the payment via FluxA Wallet

3 Agentic Action

Receive the API access token and call the service directly

This is FLUXA — building the best infrastructure for Agent Experience, ready for the age of the Agentic Economy
